Re: Resignation letter

Dear Executive Committee;

It is clear that asking this committee to do anything effectively is like asking for an event as improbable as the Our Lady of Fatima miracle. It was my expectation that with a new executive there would be a transition process; the handing over of passwords etc. This hasn't happened, probably in contradiction of the law. Instead old Committee Members are obstructive, incompetent, and holding improper influence over the elected Committee Members.

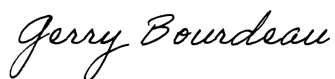

Instead of a constructive use of everyone's time, I am repeatedly treated to blathering during meetings, disappearing acts between meetings, non-executive members who don't want to take direction, and a total lack of organizational hierarchy. In short, this party is a mess and everyone in it is too sensitive/pathetic to fix it.

So, rather than being frustrated by a Leader that gives no direction, a President that babbles more than anyone else and doesn't know how to conduct a meeting, a total lack of delegation of tasks that need to be done (rather than worrying about useless issues that bring in no supporters, like constitutional amendments), an absent CFO, members-at-large that are totally absent, volunteers that want to throw immigrants into camps, and a former CFO that won't leave and resists any attempts to replace him (and who is here but isn't here but is here but not here) meddling with obvious venues of progress, I have decided to resign. Because almost ANYTHING would be a better use of my time than this has been.

Please accept this letter as my official resignation. Take me off the FB admin list. I will no longer be doing any posts for the party.

To Matt and Chris, my apologies for this. I hope it all works out.

Sincerely,

A handwritten signature in cursive script that reads "Gerry Bourdeau".

Gerry Bourdeau
